

LifePower...

What is it?

Eager to share with others the same life-changing truths God has shown him, Stuart set about writing his own programme to help people live life more successfully based on principles from God's Word. He had read many good books on the same subject, but with his desire to work with Asians, and his experience living in both China and Thailand, he wanted something he could use with Chinese and Thais; something that could be adapted to fit with the culture, that could be translated into those languages, and that could be written as a programme suitable for Christians and non-Christians. The **LifePower** programme is the result, and we are delighted that after months of preparation, he is finally able to do a pilot run at the XXXXX School with approximately 30 of the school's staff, comprising Christians and non-Christians.

The purpose of **LifePower** is to help emerging leaders reach their potential and make a positive difference in their lives, communities and nation

The **LifePower** programme empowers people in the following areas:

- having a desire to succeed in life
- taking charge in the battle of the mind
- having a vision and life purpose
- staying focused and using the power of goal-setting
- living by your values
- effective communication
- successful relationships and the power of teams
- dealing with challenges, life-balance and finishing well
- blessing others
- celebrating success

"LifePower is excellent for leaders in the community to see the hidden values in people, and with God's help brings light into their dark world." — School Founder

Please pray for the success of the **LifePower** programme among the staff at the XXXXX School, and that **LifePower** be used in many settings as a tool to empower people and bring the love of God.
